Andria:

You asked at the 6/24 exchange that I send you note updating WDIG's plans for the Area 2 EPA drums from late 1980's, and Area 7 Campbell drums from 1994. This note modifies WDIG initial intentions, described in my 6/4/98 Email to you.

1. Area 2: WDIG will tidy up the appearance of this drum storage area...grass cutting, trees from drums elimination, and eventual tarping. We think it is inappropriate/impossible to move the drums given their physical condition, and non hazardous contents. The long term option for the cuttings in these drums is placement under the final Area 2 cap.

2. Area 7: Campbell's drums will be moved into one "tight" zone, and tarped. Hope this quick note clarifies WDIG's intentions. We can perform this work in July.

Regards, Ian
